

## **EXAMINER'S AMENDMENT & REASONS FOR ALLOWANCE**

- I. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the Issue Fee.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

II. **EXAMINER'S AMENDMENT:**

Authorization for this examiner's amendment was given in a telephone interview with Mari A. Steward (Reg. No. 50, 359) on 05/19/2008.

**In the Claims:**

- a. cancel Claims 1, 4-9, 11, 27, and 28.

b. amend Claim 29 as follows:

- line 7, insert after “creating a magnifier window” -- with an expanded field-
- line 9, insert after “reading pixels from” -- video --
- line 18, insert after “retains” -- full--

III. **ALLOWABLE SUBJECT MATTER:**

Claim 29 is allowed.

The following is an examiner’s statement of reasons for allowance:

The prior art does not expressly teach or render obvious the invention as recited in independent claim 29.

The features as recited in independent claim 29 “*mapping the selected portion of magnified display in the magnifier window to a display space of the selected portion of the first document, wherein the magnifier window retains full browser functionality for the selected portion of the magnified display, wherein mapping the magnified display to the display space comprises: mapping the magnified display space for the selected portion of the magnified display to corresponding pixels in the normal display space for the first document, wherein the selected portion of the magnified display in the second display is mapped to the original document to form an imagemap, wherein the imagemap is separated into areas,*

*and wherein the areas are used to select options corresponding to the original document; and mapping mouse events occurring in the magnified display to corresponding coordinates in the normal display space associated with the first document in the first display”,* when taken in the context of the claims as a whole, was not uncovered in the prior art teachings.
